

Name: _____

SQL SELECT, WHERE, DISTINCT practice

1. Write a select statement to return all columns and rows from the customer table.

```
SELECT * FROM customer;
```

2. Write a query to select first name, last name, and email from the customer table.

```
SELECT first_name, last_name, email FROM customer;
```

3. Write a query to return all rows and columns from the film table.

```
SELECT * FROM film;
```

4. Write a query to return unique rows from the release_year column in the film table.

```
SELECT DISTINCT release_year FROM film;
```

5. Write a query to return unique rows from the rental_rate column in the film table.

```
SELECT DISTINCT rental_rate FROM film;
```

6. A customer left us some feedback about our store. Write a query to find her email address – for Nancy Thomas.

```
SELECT email FROM customer WHERE first_name = "Nancy" AND last_name = "Thomas";
```

7. We're trying to find a customer located at a certain address '259 Ipoh Drive' – can you find their phone number?

```
SELECT phone FROM customer JOIN address ON address_id WHERE address = "259 Ipoh Drive"
```

8. Write a query from the customer table, where store id is 1 and address id is greater than 150.

```
SELECT FROM customer WHERE store_id = 1 AND address_id >150;
```

9. Write a query from the payment table where the amount is either 4.99 or 1.99.

```
SELECT FROM payment WHERE amount = "4.99" OR amount = "1.99" ;
```

10. Write a query to return a list of transitions from the payment table where the amount is greater than 5.

```
SELECT FROM payment WHERE amount > 5;
```
